Miss Grundy, the Washington society correspondent, thinks that the Cabinet officers must be paid more salaries or cease to entertain. That's her lofty idea of the moral of the moment. "From \$15,000 to \$17,000." she says, "is the very smallest amount with which a member of the Cabinet can manage to go through the year, keeping up such an establishment as will meet the demands society makes upon him." Perhaps Miss Grundy has imbibed the opinion that the Cabinet was instituted for purposes of social glitter and display, and that the Belknap exposure is a mere vulgar interruption to the receptions and ball givings at Washington that fulfill the uses for which the Government was established. So nearly perfect are the recipes of these wonderful pain-soothing and healing Centaur Liniments, that we can confidently say they will alleviate any pain arising from flesh, bone or muscle derangements. We do not pretend that they will mend a broken leg or exterminate boils, but even in such cases they will reduce the inflammation and stop the pain. Nor can we guarantee the proper results where the body is poisoned by whisky. Temperance is as necessary to a proper physical, as mental condition.

Ayer's Cherry Pectoral.

Among the great discoveries of modern science, few are of nore real value to nankind than this ef-ectual remedy for all lisenses of the Throat and Lungs. A vast trial of its virtues, throughout this and other countries, has shown that it does

other countries, has shown that it does surely and effectually control them. The testimony of our best citizens, of all classes, establishes the fact, that Cherry Pretonal will and does relieve and cure the afflicting disorders of the Throat and Langs beyond any other medicine. The most dangerous affections of the Pulmonary Organs yield to its power; and cases of Consumption, cured by this preparation, are publicly known, we remarkable as hardly to be believed, were they not proven beyond dispute. As a remedy, it is adequate, on which the public may rely for full protection. By curing Coughs, the forerunners of more serious disease, it saves unnumbered lives, and an amount of suffering not to be computed. It challenges trial, and convinces the most sceptical. Every family should keep it on hand as a protection against the early and unperceived attack of Pulmonary Affections, which are easily met at first, but which become incurable, and too often fatal, if neglected. Tender lungs need this defence; and it is unwise to be without it. As a safeguard to children, amid the distressing diseases which beset the Throat and Chest of childhood, Cherrar Pretronal is invaluable; for, by its timely use, multitudes are rescued from premature graves, and saved to the love and affection centred on them. It acts speedily and surely against ordinary colds, securing sound and health-restoring sleep. No one will suffer troublesome Influenza and painful Bronchitis, when they know how easily they can be cured.

Originally the product of long, laborious, and successful chemical investigation, no cost or toil is spared in making every bottle in the utmost possible perfection. It may be confidently relied upon as possessing all the virtues it has ever exhibited, and capable of producing cures as memorable as the greatest it has ever effected.
